

RENEW YOUR CLUTCH ACTUATION

CLUTCH FORK & PIVOT BALL KITS

When replacing a clutch kit, it is important to check clutch actuation accessories including clutch forks, cross shafts, pivot balls, guide tubes & cables for wear or damage.

Heavily worn components can cause pedal feel issues, especially with a new clutch kit fitted due to changes in the installed height.

To make this process as simple and efficient as possible, ACS offer a comprehensive range of clutch fork and pivot

ball kits so that these two critical components can be changed as a matching set.

- Extensive stock holding around Australia
- OE quality replacement components
- Renews clutch actuation and pedal feel
- Clutch forks, cross shafts and pivot balls to suit most popular makes and models

"Our mission is to provide the highest Quality, Innovation & Service to our customers across Australia and around the world"
