ACS clutch kits are structured into four different series types with varying components included in each, ensuring customers can purchase the kit best suited to their requirements. Availability of each kit is vehicle specific depending on the components required for that application. The four kit series types include:

STANDARD SERIES KIT

Pressure plate, friction disc (+ release bearing where required)

400 SERIES KIT

Pressure plate, friction disc & concentric slave cylinder

500 SERIES KIT

Pressure plate, friction disc & flywheel (+ release bearing where required)

600 SERIES KIT

Pressure plate, friction disc, concentric slave cylinder & flywheel

In addition to the various kit options, ACS includes an alignment tool and spigot bearing where required in their ClutchPro Plus kits and across their performance range.
